

Dockside Green Community Conversations

Victoria, BC

Project Description

Dockside Green is re-engaging with the City of Victoria and citizens to collaborate in building on the original innovation of Dockside Green and address a number of challenging issues. They wanted to ensure what happens on the site is relevant, vibrant and enduring for residents and all citizens of Victoria.

PlaceSpeak Contribution

PlaceSpeak provided an online consultation platform where community members could view the ongoing details of the Dockside community engagement process, comment on specifics, and start their own conversations.

Project Outcome

Input received through PlaceSpeak helped identify emerging ideas for the Dockside Green Neighbourhood Plan and were incorporated into the draft community plan.
